

Thomson Filter Vials (patented) are designed to speed up sample prep and analysis. The plunger filter with different membranes nestles into the vial while simultaneously filtering and readying the sample for any Autosampler. This is a process that minimizes any loss of sample eliminating multiple transfers. Pre-slit caps ensure a no-hassle, clean aliquot withdraw. Eliminating breakage of expensive needles, coring problems on the HPLC or Mass Spec. Thomson Filter Vials are compatible with most standard Autosamplers; such as Agilent® and Waters® including the UHPLC™. The ease of use will make the Filter Vial indispensable in all laboratories.

Here at Thames Restek, we are official suppliers of Thomson Filter Vials across the UK. To place an order, call us today on 01494 563377 or email us at sales@thamesrestek.co.uk
